# Miva Engine 3.96

## Release Notes

---

Miva Engine 3.96, released December 2002, includes the following:

### Fixed Items

- ISAPI no longer uses per-thread heap memory allocation.
- Runtime & File Errors are now encoded.
- On UNIX/LINUX, all SSL functions will be properly loaded from the libcrypto library.
- Calling MvEVAL inside an MvDO that is inside an MvSMTP loop is now properly directed to mail rather than to screen.
- Runtime errors no longer report "Record is not in index" when the record is actually in the index.
- Structures can now handle submitting multiple checkboxes with the same name.
